**anti-BCL-3**

Cat #: HM1031  
Rabbit polyclonal IgG  
0.2 µg/µl, store at 4 °C

For research use only

**BACKGROUND**

B-cell CII/lymphoma 3 (BCL-3) is a proto-oncogene. It is translocated into the immunoglobulin alpha-locus in some leukemia cases. BCL-3 contains seven ankyrin repeats, which are also found in I kappa B protein. BCL-3 plays a role in the immune system through its interactions with the NF-kappaB family of transcription factors, regulating the activity of homodimeric NF-kappaB p50 subunit. It is expressed in several tissues, including spleen and other lymphoid tissues.

**SPECIFICITY**

This antibody recognizes BCL-3 of human, mouse and rat origin.

The antibody can be used in Western blotting, immunoprecipitation and immunostaining.

Molecular weight of BCL-3 on Western blotting is about 60 kDa.

**IMMUNOGEN**

A recombinant protein corresponding to the C-terminus of human BCL-3 protein.

**STORAGE**

This antibody is stable for 12 months when stored at 2-8°C.
