

anti-HA HRP

Cat #: HM2050
Mouse monoclonal IgG
0.2 ug/ul, store at 4 °C

For research use only

APPLICATIONS

HA tag (YPYDVPDYA) is derived from the hemagglutinin of the influenza virus and widely used in studying recombinant proteins.

HRP-conjugated anti-HA tag antibody is useful for identifying HA tagged fusion proteins.

In AntibodyArray™ assays, the protein of interest can be expressed as HA tagged fusion protein. Then it can be identified with the HRP-conjugated antibody.
